

FOR IMMEDIATE RELEASE:

**Sodick Plustech Hosts ‘Coffee Talk’ at PTXPO
Bringing Industry Leaders Together for Insightful Conversations**

Elk Grove Village, IL (March 4, 2025) – Attendees at PTXPO 2025 will have a unique opportunity to engage with top industry experts in an approachable, interactive format at Sodick Plustech’s Booth #527. With its Coffee Talk format, Plustech is providing a central hub where visitors can grab a cup of coffee and gain insights from leading companies like Alba Enterprises, Cold Jet, Nexus, Orbital Plastics Consulting, Polyplastics, and Westfall Technik. PTXPO runs March 18-20 at Donald Stephens Convention Center, in Rosemont, IL.

“The Coffee Talk format is all about creating an open and easygoing space for industry professionals to connect, learn, and exchange ideas,” said Kohei Shinohara, Senior Vice President of Plustech. “Our hope is that attendees can engage with leading experts, discover the latest innovations, and walk away with valuable knowledge, all in one place.”

A One-Stop Knowledge Hub

Visitors are invited to join Plustech for stimulating discussions over coffee, exploring innovative technologies and expert insights that address the evolving demands of precision molding.

From mold components and automation solutions (Alba Enterprises) to advanced Innovations & technology in LSR dosing systems, molds & cold runner technology (Nexus), world class materials innovation (Polyplastics), and cutting-edge precision tooling and production solutions (Westfall Technik), Plustech’s Coffee Talk offers a little something for everyone. Orbital Plastics Consulting will be on hand to discuss training, part design, processing optimization, tooling review and material selection. While Cold Jet will not only be sharing insights on dry ice cleaning, but also hosting live demonstrations throughout the show.

-MORE-

Attendees can expect a dynamic networking hub where industry experts, including representatives from these six leading vendors, converge to share cutting-edge solutions for today's most challenging molding issues.

"At Mold Craft, DBA Westfall, we've spent 60 years perfecting the technology required to mold parts as small as, or smaller than, standard pellets. But precision mold design alone isn't enough," said Jim Liddell, Director of Business Development, Tooling for Westfall. "Success in Micro Molding depends on a machine that delivers absolute consistency. That's why we trust and recommend Sodick Plustech. Their unique two-stage injection system ensures precise control over temperature, pressure, and fill volume -- critical factors for achieving repeatable, high-quality results in Micro Molding."

"If you're attending PTXPO, be sure to stop by the Plustech booth to experience the future of molding technology in a welcoming atmosphere that fosters meaningful connections and sparks innovative ideas," said Shinohara. "Whether you're looking for technical expertise, networking opportunities, or just a great cup of coffee, Coffee Talk at PTXPO will deliver."

ABOUT PLUSTECH

Plustech is a leading provider of precision injection molding machines and the exclusive North American distributor of Sodick Injection Molding Machines. With a commitment to innovation, Plustech delivers high-performance solutions that maximize efficiency, accuracy, and reliability. Sodick Injection Molding Machines feature advanced linear motor technology, two-stage plunger systems, and patented V-LINE® technology, ensuring ultra-precise control, minimal material waste, and high repeatability. These machines excel in medical, automotive, electronics, and micro-molding applications, where precision is critical. Celebrating more than 20 years in North America, Plustech operates from a 138,000-square-foot facility in Elk Grove Village, Illinois, providing industry-leading sales, technical support, service, and training. With cutting-edge solutions and expert insights, Plustech helps manufacturers stay competitive and profitable. For more information, visit www.plustech-inc.com or call 847-490-8130
