

FOR IMMEDIATE RELEASE:

Sodick-Plustech Hosts Partner Showcase at IACMI in Detroit *Second Stop in a Showcase Series Focuses on Materials*

Elk Grove Village, Ill. (December 2023) – Plustech Incorporated hosted a successful Partner Showcase at IACMI - The Composites Institute in Detroit, Michigan, on December 12th. This event, building on the success of the showcase series initiated earlier this year in Newington, CT, brought together industry experts from RJG, Beaumont Industries, Polyplastics USA, Moldex3D, and more, to dive into the crucial role of materials in the injection molding process.

The showcase featured Tech Talks covering a spectrum of injection molding materials, from the versatility of thermoplastics to the innovation potential of silicones and composites. Prominent speakers from leading companies delved into topics such as the unique qualities of super engineering plastics in automotive applications, the correlation between simulation and real-world results, and strategies for efficiency gains and waste reduction in addressing scrap rates in injection molding.

A tour of The Institute for Advanced Composites Manufacturing Innovation (IACMI) facility was a notable aspect of the event. This tour, facilitated by the Michigan State University Scale-Up Research Facility (MSU-SURF) staff, showcased exciting equipment, including a 3000T molding machine with water assist, receiving positive responses from attendees, and underscoring the industry's keen interest in cutting-edge technologies.

Reflecting on the significance of the showcase, Bennett Howard, Technical Sales Engineer at Plustech Inc., emphasized, "It's important to get people together with all different sorts of experiences in the plastic and tooling world. It's an industry that's constantly evolving so it helps to understand what's out there and what sort of best practices exist."

Naga Battini from Stanley Engineered Fasteners was the lucky winner of Pistons tickets, provided by registration raffle, thanks to partner Polyplastics USA. The event primarily attracted professionals from Michigan, Ohio, and Kentucky, providing another valuable opportunity for networking, collaboration, and knowledge exchange.
