

FOR IMMEDIATE RELEASE:

SODICK PLUSTECH GL30A EXHIBITS PRECISION AT MD&M ANAHEIM

ELK GROVE VILLAGE, Ill. (February 2, 2024) – Plustech Inc., a renowned industry leader specializing in injection molding machinery and equipment, will be showing at the MD&M West Conference in Anaheim, CA. The conference is scheduled to take place from February 6-8 at the Anaheim Convention Center and will spotlight the latest technology in the medical device manufacturing industry.

Following an overwhelmingly positive response to their machinery showcase at MD&M Minneapolis, Sodick will exhibit at MD&M West in partner Westfall-Technik's Booth #4001. With a live demonstration, guests can experience the power of collaboration firsthand as the GL30A small Sodick Injection Molding Machine (IMM) interacts seamlessly with Polyplastics Laperos® LCP materials, and technology from Westfall-Technik. The achieved result is highly engineered plastics parts with molded precision that goes well beyond the industry standard to meet the demanding needs of medical devices.

"The transformative potential of our technology to create micro-molded precision parts makes medical device manufacturing a natural for Sodick-Plustech," said Kohei Shinohara, Vice President of Sodick-Plustech, expressing his enthusiasm. "We look forward to demonstrating our capabilities with our show partners."

In addition to the machinery showcase, MD&M West will offer educational sessions and conference programs. Distinguished speakers from top-tier companies within the medical field will present their insights and findings, providing guests a front-row seat to the latest industry advancements and best practices. By expanding its reach through diverse fields of manufacturing, and medical technology specifically, Plustech's solutions continue to find new ways to evolve.
