

FOR IMMEDIATE RELEASE:

Plustech, Inc to Present *Take the Plunge* In-Booth Demo at PTXPO in March

ELK GROVE VILLAGE, Ill. (February 11, 2022) – Sodick-Plustech will present a demonstration, *Take the Plunge*, on Wednesday, March 30th from 2:30pm – 3:00pm in Booth 433 during PTXPO, North America’s Plastics Processing Expo, being held March 29-31 at the Donald E. Stephens Convention Center, in Rosemont, Illinois. Molders of ultra-precision, tight tolerance parts with micro-features are invited to attend the presentation by injection molding machinery industry specialist, Len Hampton, National Sales Manager, Sodick IMM by Plustech Inc.

In-booth demonstrations will include the Sodick GL100A – LSR machine, running a four-cavity duckbill mold, featuring a four drop valve gated cold runner, using Momentive’s LSR material. The mold will run fully automatic and feature in-mold slitting done by a robot manufactured by M.R. Mold. The robot provides a renewable surface for every slit.

The demo will also feature a high cycle Sodick LP20EH3 machine, using Sumitomo’s Sumika Super LCP material running a Matrix Tool Inc. four-cavity mold with 60 knife blade edges – a part so complex that it won the Hot Shots Award in both categories at PT’s Molding 2021 show.

Also featured at the Sodick-Plustech booth will be a clear, mechanical mock-up injection unit that allows visitors to view the inner workings and technology of Sodick’s proprietary Two Stage plunger injection system.

-MORE-

Hampton is an injection molding machinery industry specialist with decades of experience in the field. His expert knowledge of the industry, machinery, materials, and players have provided him with an unparalleled background to ensure Plustech IMM customers are producing some of the most sophisticated, ultra-precision micro-molded parts currently being manufactured in the world.

ABOUT PLUSTECH INC.

Plustech Incorporated is an injection molding machine industry leader that has been doing business in North America for more than 30 years. Based in a new, state-of-the-art 138,000 square foot facility in Elk Grove Village, Illinois, Plustech has made a commitment to delivering the highest quality machines, the strongest technical support, and the most experienced service team to ensure our customers' profitability and competitive edge toward productivity in the high-demand injection molding manufacturing industry.
