

**FOR IMMEDIATE RELEASE:**

## **Sodick - Plustech to Host NPE “Sneak Peek” Preview at North American HQ**

**ELK GROVE VILLAGE, III. (FEBRUARY 21, 2024)** - Plustech Inc. will host an NPE Preview Partner Showcase Thursday, April 11, from 10AM - 4PM at its state-of-the-art, 138,000 square foot North American headquarters, located at 111 NW Point Blvd, Elk Grove Village, IL, just outside of Chicago.

Scheduled one month prior to the NPE show, taking place May 6-10 in Orlando, the April 11th Plustech showroom event will allow customers and industry peers in the Midwest a preview opportunity to witness Sodick’s innovative machinery in action, while also experiencing the capabilities and hearing from other respected industry partners such as RJG, Westfall Technik, RDAbbott, Beaumont Technologies, AIM Institute, Nexus, and others. All are invited but guests are asked to RSVP, as box lunches will be provided and a cocktail reception will close out the day.

“We’re looking forward to providing another opportunity for the industry to come together in a forum that will likely provide a bit more one-on-one time to get their questions answered, explore what our partners are doing, and experience the exacting precision of our machines,” said Plustech VP Kohei Shinohara about the NPE Preview. “The showcases allow us to connect with people who might not otherwise make it to a show. We’re proud to provide the industry with opportunities to get together and stay up to date on latest advancements.”

Plustech’s NPE sneak peek marks the latest event in the company’s successful Partner Showcase series, having previously made stops in [California](#), Connecticut, and most recently in Detroit, Michigan. Following a successful exhibition at MD&M West in Anaheim, California in February, Plustech was inspired to bring together industry partners ahead of the NPE show in Orlando May 6-10, providing the Midwest region a

preview of some of the technology they'll be presenting in Florida with an exploration into high-cavitation, micromolding, silicone molding, and metal 3D printing. Slated to join the event are a variety of industry leaders and partners providing molds and machines for live action demonstrations.

Attendees will have the chance to experience international innovation firsthand, with a must-see VR40G two-station rotary table, fully automated molding cell, with low table height and rapid turntable movement, specially flown in from Sodick Japan, as well as a GL60A LSR, with Nexus mold and pumping unit, as well as other equipment.

Plustech extends an open invitation to all industry professionals and enthusiasts, but requests that potential attendees RSVP by emailing [BennettHoward@plustech-inc.com](mailto:BennettHoward@plustech-inc.com), or calling 847-490-8130, ext. 1036.

### **ABOUT PLUSTECH INC.**

Plustech Incorporated is a joint venture between Sodick Co. Ltd. and Yamazen Corporation, to deliver Sodick V-LINE Two Stage Plunger Injection Molding machinery since 2004.
